

Built-In Coffee Machine Care Guide

Max Appliance Repair Halifax - Homeowner Guide 2026

Your Cleaning Schedule

1 After each use

Purge the group head and wipe the steam wand.

2 Weekly

Backflush with water and wipe the brew group and screen.

3 Monthly

Run a cleaning-tablet cycle and soak the portafilter and baskets.

4 Every 1 to 3 months

Descale, and go shorter if your water is hard.

Descaling Done Right

1 Use the approved solution

Follow the manual; never substitute vinegar or random acids.

2 Rinse thoroughly

Flush two or more reservoirs of fresh water before brewing.

3 Refit a fresh filter

A water filter cuts the minerals that feed scale.

4 Call a pro if it persists

Cool or weak shots after descaling mean a service check.
